Professional Summary

IT and systems professional with 25+ years of experience supporting enterprise applications, IT infrastructure, and data platforms across distributed environments.

Skilled in troubleshooting system and network issues, configuring and maintaining servers, and supporting hardware and software environments to ensure reliable performance.

Known for quickly diagnosing complex technical problems, stabilizing systems under load, and working independently to resolve production issues across infrastructure, applications, and data layers.

Core Competencies

- Network troubleshooting & connectivity diagnostics
 - Server setup, configuration, and maintenance
 - Hardware & software installation and support
 - System performance monitoring and optimization
 - Production support & incident resolution
 - IT infrastructure reliability & operations
 - Cross-system integration and data flow troubleshooting
 - End-user and team technical support
-

Experience

Independent Consultant

Industry / Client Focus: Small business platforms, automation, database-backed applications
04/2024 – current

- Provided technical support and troubleshooting across small business systems, including application, database, and infrastructure issues
- Configured and maintained development and runtime environments using Docker and cloud platforms
- Diagnosed and resolved system performance and connectivity issues across API integrations and database systems
- Assisted with setup and configuration of software environments, ensuring stable and repeatable deployments

Project Consulting Services, Inc. (via TEKsystems) — Senior Consultant

Industry / Client Focus: Oil & Gas, provides professional services for energy infrastructure
08/2015 – 04/2024

- Troubleshoot and resolved production issues across distributed systems, including database, integration services, and connectivity and infrastructure-related failures
- Supported enterprise data platforms and integration systems, ensuring reliable system performance and uptime
- Diagnosed performance bottlenecks and system slowdowns, improving responsiveness and stability
- Collaborated with infrastructure and development teams to resolve system-level issues impacting application performance
- Worked with cloud-hosted environments (Azure SQL and related services) to maintain system reliability

Independent Consultant

Industry / Client Focus: legacy modernization enterprise applications
03/2014 – 08/2015

- Delivered custom .NET/MVC and web applications using HTML5, CSS3, JavaScript, and Database-backed application architecture.
- Built responsive UI, database-driven workflows, reporting views, and analytics outputs for small business and enterprise use cases.
- Supported legacy modernization by integrating older systems with web applications, relational databases, APIs, and integration services-style data flows.

Steton Technology Group — Lead Architect

Industry / Client Focus: Food & Hospitality, SaaS platforms, mobile data collection
01/2004 – 03/2014

- Led operation and support of a multi-tenant SaaS platform, including system monitoring, issue resolution, and performance tuning
- Maintained application and database infrastructure supporting thousands of users
- Implemented cloud-based infrastructure improvements to enhance system availability and reliability
- Diagnosed and resolved production issues across application, database, and infrastructure layers

SeeBeyond — Senior Consultant

Industry / Client Focus: Software, integration platform / iPaaS
10/2002 – 12/2003

- Supported enterprise integration environments, troubleshooting data flow and system communication issues
- Maintained and monitored interfaces across distributed systems to ensure reliable data exchange
- Worked within regulated environments requiring stable and secure system operation

Computer Sciences Corporation — Senior Consultant

Industry / Client Focus: Professional Services

10/2001 – 10/2002

- Supported enterprise integration systems and assisted in resolving system connectivity and data exchange issues
- Developed and maintained integration services components supporting large-scale environments

Fluor Corporation — Enterprise Integration Team Lead

Industry / Client Focus: Engineering, procurement, and construction, large scale projects

01/1999 – 10/2001

- Supported enterprise messaging and integration and integration infrastructure
- Conducted troubleshooting and validation of system communication across platforms
- Assisted with infrastructure transitions during legacy-to-SAP migrations

PM Realty Group — MIS Manager

Industry / Client Focus: Asset management, real estate

01/1996 – 01/1999

- Managed IT operations, including IT infrastructure, system connectivity, and user support
- Led LAN/WAN upgrades and ensured reliable communication across office locations
- Supported business-critical systems and provided hands-on technical troubleshooting

Access Development Corp — System Administrator / Programmer

Industry / Client Focus: Travel and merchandise discount platform

05/1986 – 01/1996

- Administered Client/server and LAN-based systems and supported internal users with hardware and software issues
- Installed, configured, and maintained business applications and system environments
- Migrated systems from legacy platforms to client/server and LAN-based systems

Technical Skills

Systems & Infrastructure

Windows/Linux environments, system configuration, environment setup

Networking

LAN/WAN concepts, connectivity troubleshooting, distributed systems communication

Databases

SQL Server, PostgreSQL, Azure SQL, database troubleshooting and performance

Cloud Platforms

Azure, AWS, GCP

Tools & Platforms

Docker, Portainer, CI/CD pipelines, system monitoring tools

Programming/Scripting (support-focused use)

C#, Bash, PowerShell, SQL

Education

Brigham Young University — Computer Science

1985 – 1986
