Long Beach, CA • david_1428@outlook.com • +1 562-833-4552

Professional Summary

Senior SQL Server and data platform professional with over 25 years of experience supporting mission-critical systems and data-centric enterprise applications. Specialized in Microsoft SQL Server performance and query tuning, ensuring database reliability across on-premise and cloud environment relational database services, including Azure SQL. Known for diagnosing complex database performance issues, improving query and indexing strategies, and collaborating with development teams to build scalable, stable data platforms.

Experience

Independent Consultant

04/2024 – current

- Designed and implemented .NET applications and automation solutions integrating MariaDB and Microsoft SQL Server databases and modern APIs for small business platforms.
- Developed database-driven reporting and analytics workflows using relational databases and cloud data services.
- Applied AI-assisted automation and data processing techniques to streamline operational workflows and reduce manual data handling.

Project Consulting Services, Inc. (via TEKsystems) — Senior Consultant

08/2015 – 04/2024

- Built middleware integrating multiple vendor platforms with a Microsoft SQL Server based data warehouse, reducing processing latency from 24+ hours to near real-time.
- Developed SQL coding standards and query design patterns that enabled developers to quickly diagnose and correct performance issues related to table variables and memory-intensive query patterns.
- Implemented query and index optimization practices informed by industry performance tooling and Azure SQL automatic tuning capabilities.
- Partnered with development teams to troubleshoot Transact-SQL performance issues and guide query tuning activities.
- Implemented Power BI reports and dashboards that transformed complex data into clear, actionable insights

Independent Consultant

03/2014 – 08/2015

- Delivered custom .NET/MVC and browser-based applications using HTML5, CSS3, JavaScript, and SQL-backed application patterns.
- Built responsive UI, database-driven workflows, reporting views, and analytics outputs for small business and enterprise use cases.
- Supported legacy modernization by integrating older systems with web applications, relational databases, APIs, and middleware-style data flows.

Steton Technology Group — Lead Architect

01/2004 – 03/2014

- Led development and operation of a SaaS platform supporting thousands of enterprise users across multiple industries.
- Designed a logical analytics layer using database views to support business intelligence (BI) and reporting workloads without impacting transactional systems.
- Led cloud platform initiatives using Azure and AWS to improve system reliability, scalability, and operational efficiency.
- Designed a disaster recovery strategy achieving a 4 hour recovery time objective with an 8 hour recovery point objective, while incorporating encryption throughout the entire disaster recovery lifecycle.
- Deployed SSIS and SSRS to enhance integration and reporting services for SaaS customers.
- Used Erwin to model customer data for storage and reporting.

SeeBeyond — Senior Consultant

10/2002 – 12/2003

- Acted as player/coach delivering reusable integration frameworks supporting 400+ interfaces using SeeBeyond e*Gate and Java.
- Delivered secure HIPAA-compliant healthcare data integrations for hospital and clinical systems.
- Served as lead developer and architect for multiple enterprise integration programs including the US Army LMP SAP implementation, Regence Health, Commerce One, and Canada Post.

Computer Sciences Corporation — Senior Consultant

10/2001 – 10/2002

- Designed SAP integration components and mentored development partners.
- Delivered enterprise integration architecture guidance for NASA's IFMP SAP implementation.
- Performed hands-on development using Java and T-SQL for enterprise integration systems.

Fluor Corporation — EAI Team Lead

01/1999 – 10/2001

- Served as technical lead for legacy-to-SAP system integration initiatives using SeeBeyond e*Gate.
- Conducted proof-of-concept work using IBM MQSeries and enterprise messaging platforms.
- Collaborated with vendors and architects to deliver enterprise middleware architecture solutions.

PM Realty Group — MIS Manager

01/1996 – 01/1999

- Managed IT operations supporting distributed corporate offices and enterprise systems.
- Led LAN infrastructure upgrades and delivered WAN connectivity solutions.
- Developed an integrated purchasing, accounts receivable, and asset management system using .NET and SQL-based databases.
- Created an SSRS reporting suite used by A/R, purchasing, and maintenance teams, reducing the monthly time required to reconcile accounts and inventory.

Access Development Corp — System Administrator / Programmer

05/1986 – 01/1996

- Developed CRM and shipping system modules using DIBOL for internal business operations.
 - Migrated legacy applications to a LAN-based client/server architecture, rewriting systems using SQLWindows.
 - Leveraged SSIS to migrate data from legacy systems.
-

Education

Brigham Young University — Computer Science

1985 – 1986

Skills

Data & Databases

SQL Server 2022, Azure SQL Database, Azure SQL Managed Instance, PostgreSQL, Redis, SQLite, Oracle (8i)

Database Engineering

SQL performance tuning, query optimization, indexing strategies, database reliability, high-availability concepts, data warehousing

Programming

C#, JavaScript, Java, Python, Bash, PowerShell, T-SQL, PL/SQL, HTML, CSS

Cloud & Platforms

Azure, AWS, GCP, SaaS platforms

Architecture & Systems

Microservices, MVC, RESTful APIs, CQRS, 12-Factor App, SOLID

Integration & Messaging

HL7/FHIR, MQSeries, MSMQ, RabbitMQ, Apache Kafka, SAP integration, Azure Service Bus

DevOps & Delivery

Docker, Kubernetes, CI/CD, Test-Driven Development (TDD), automated testing

Automation

Apache Airflow, Terraform, GitHub Actions, Jenkins

Leadership

Technical strategy, mentorship, stakeholder alignment
